Professional Summary

Multimedia and Graphic Design graduate with a focus on illustration, visual storytelling, and interactive design. I enjoy working across different formats such as editorial layouts, educational content, illustrated books, and simple game concepts. My approach combines creativity with clarity, aiming to make ideas easy to understand and visually engaging.

I have experience developing visual concepts from sketch to final design, and I'm comfortable working in iterative processes with feedback and quick adjustments. I'm interested in projects that mix design, learning, and interaction, especially in educational or playful contexts.

I work confidently in English and enjoy collaborating in team environments where ideas evolve through discussion and experimentation.

❖ Education
